

EFIT⁶

FACIAL COMPOSITE SOFTWARE

VISION
METRIC

EFIT@VISIONMETRIC.COM | +44 (0) 1227 811790

THE PRODUCT

Used by eyewitnesses to create a computerised sketch or image of a criminal suspect, the EFIT facial composite software is the preferred choice of 90% of UK police forces and used in over 30 countries around the world.

The new EFIT6 product uses the latest advances in artificial intelligence, image processing and our understanding of human facial memory together with good, common-sense police practice.

The result is a system that provides unparalleled ease of use and accuracy. EFIT6 is simply the world's most advanced and comprehensive facial composite software.

THE BENEFITS

Early leads in major investigations save time, money and effort and can be crucial to their ultimate outcome. EFIT6 can provide these leads when no hard forensic evidence is available.

EFIT6 does not even need a witness to give a good verbal description of the face but works according to recognition principles.

It has proven highly effective with all types of eyewitness including the very young, the very elderly and also the many who struggle to describe the individual features of the face.

It is easy to understand, easy to operate and the output can be readily searched against automatic face recognition systems.

THE TRAINING

VisionMetric supplies 90% of UK police forces with their facial composite software.

The company has an outstanding track record extending over 25 years in training both UK and international police and is widely recognised as the leading company for facial ID training in the UK.

Recent international destinations have included USA, Canada, Chile, Colombia, Slovenia, Australia, South Africa and Ghana.

FEATURES

INTELLIGENT SOFTWARE

The software actually learns from the witness, guiding a gradual progression towards the suspect's face.

DATABASE CUSTOMISATION

16 databases included, covering the broad demographics of Europe, the Middle East, South East Asia, North and South America. Additional databases can be included upon request to provide a bespoke system for deployment in other geographical regions.

EXTENSIVE ACCESSORY LIBRARIES

Thousands of accessories including clothing, beards, glasses and jewellery.

TRANSFORMATION TOOLS

Quick and easy adjustment of age, expression, feature scaling and position.

AUTO BLEND TOOL

Fully automatic tool for seamless blending of hairstyles, beards and moustaches to the face.

AUTOLINK TO INDUSTRY STANDARD IMAGE EDITING SOFTWARE

Export the entire composite image or individual layers to (and import from) your chosen image editing software.

TECHNICAL INFORMATION

Operating systems supported: Windows 7 64 bit, Windows 8 64 bit, Windows 10 64 bit

Recommended system: Memory: 8GB Ram or more | Screen Resolution: 1920x1080 or higher
3D accelerated video card | Processor: Intel i5 or AMD A10 or better | Disk space used: 1GB

Recommended Paint Programs: EFIT6 automatically links to all industry standard paint programs including Adobe Photoshop, Photoshop Elements and Corel Paintshop Pro.
