Early identification of suspects in criminal investigations saves time, money and effort and can be crucial to their ultimate outcome.

The **EFIT⁶ FACEbox** can provide these identification leads whenever there is no hard forensic evidence available.

EFIT⁶ works according to unique recognition principles. It does not even need the witness to give a good verbal description of the face and has proven highly effective with all types of eyewitnesses, including the very young, the very elderly and also the many who struggle to describe the individual features of the face.

EFIT⁶ FACEbox is easy to understand, easy to operate and the results will speak for themselves. It is simply the world's most advanced and complete facial composite system.

“ All facial identification experts in the 9 provinces of South Africa are trained and operational using **EFIT⁶**. Due to the procurement and implementation there was an **increase in production and vast positive feedback from the detectives on arrests of suspects**. For the past 3 years, a total of approximately **9398 faces of suspects were compiled to assist in criminal investigations.**”
